This app will replace your default status bar, with one that's made by you. You can replace it with any image, video, gif or text that you find online. If you would like to use the same picture everytime then that is also possible. There are optional settings included in the app which can be adjusted, all of which are displayed below: The free version of this tool has no ads and allows for 5 custom images per day. If you wish to remove ads or get higher resolution images then there is a premium version available on the Play Store for $1.29 (AUD). The free version of this app supports up to 300 pixels wide at max on the status bar. The premium version will support 700 pixels on the right of the status bar, but no more real estate on the left side. This app requires Android version 2.1 or higher, but is compatible with older versions if they are updated to 2.1 through their manufacturer's support site. It does not support tablets running Android 2.2 or lower due to Gingerbread being unstable with some tablets' RAM sizes. This app is currently only available for Android devices running latest version of Android (Marshmallow). This app works on all custom roms based on Android 6.0 Marshmallow. It will not work on Android 6.0 marshmallow stock rom of any device. If you are using KitKat, you might need to use an old version, 0.7b, instead of this one. This app works on all custom roms based on Android 5.1 Lollipop and 5.0 Lollipop with no bugs since last update (v0.8b public release). It will not work on stock lollipop 5.0/5.1 ROMS of any device (Galaxy S5, Galaxy Note 3 etc. etc.). This app works on all custom roms based on Android 4.4 KitKat and 4.4.2 KitKat with no bugs since last update (v0.9b public release). It will not work on stock kitkat 4.4/4.4.2 ROMS of any device (Galaxy S3 mini, Galaxy S3 etc.) This app works on all custom roms based on Android 4.1 Ice Cream Sandwich and 4.1 Jelly Bean with no bugs since last update (v0.9b public release). It will not work on stock ICS/JB ROMS of any device (Galaxy SII, Galaxy Nexus etc.). This app works on all custom roms based on Android 2.3 Gingerbread and 2.3 Froyo with no bugs since last update (v0.10b public release). It will not work on stock Ginger/Froyo ROMS of any device (Galaxy S, Galaxy Note etc.). This app is a free tool which you need to copy the apk files from the apk download links given below and place it inside your sdcard/adress bar file path. Then long press your power button to start this app through it's own shortcut that will automatically replace the default status bar image with your custom image set as default image once you have downloaded and installed this app.
